

MODERN LANGUAGES

WORKING WITH TIME

The four clocks show the time in different cities due the time-zone differences.

When it is 10.30 am in London. Quelle heure est-il à Paris?

Which city is furthest from London? How can the clocks tell you this?

The time in Rome is the same as in Paris. You would ask the time in Rome by saying, *Che ora è?*

Can you think of any other subjects where the time in other countries might be important?
