

Captain Planet Challenge

Your mission, if you choose to accept it is to investigate a climate or environmental issue then create a Super-Hero character that strives to combat this issue. Your character must have special powers in relation to climate change or the environment. E.g. Captain Recycle (*I am sure you can come up with something better than that*)

Once you have created your character you **must** do the following:

- Create a national campaign encouraging others to take on board your message. This must include the reasons why it is so important. *A poster may be one way you can do this but you might think of other ways!*

You could:

- Create a costume for your super hero using recycled materials.
*These materials **MUST** be able to be recycled or reused afterwards.

Here are some of the themes you may wish to investigate:

- Plastic and the effect it is having on our seas
- The effect that flushing wipes and nappies has on our water system.
- The effect of climate change on Wildlife.
- The effect of investing in renewable energy.

Showcasing Work

If you would like to showcase your work all you need to do is:

- Send pictures of your campaign along with your name, school or class.
- Tweet [@StirlingLfs](https://twitter.com/StirlingLfs)
- Or email sustainablestirling@glowmail.org.uk to put the pictures up.

Please keep photos to pictures of the item you have produced.
