

“In the Hoose” LfS Challenge

People from countries from all over the world are very useful and skilled in using locally available resources in the classroom or their house. In education, we call this TALULAR (Teaching and Learning Using Locally Available Resources).

Since we have nowhere to go and have some time on our hands, we may as well be creative!

Your challenge (*if you choose to accept it*), is to create a learning or teaching aid that you can use in your class/learning OR it could be a family game or household item.

RULES

1. You must only use materials that you have already in your house. **DO NOT** go out and buy anything.
2. Only use items that you have finished with or were going to recycle.
3. It must **NOT** be thrown away afterwards. Keep it forever – the idea is that you actually use it!
4. Be safe!

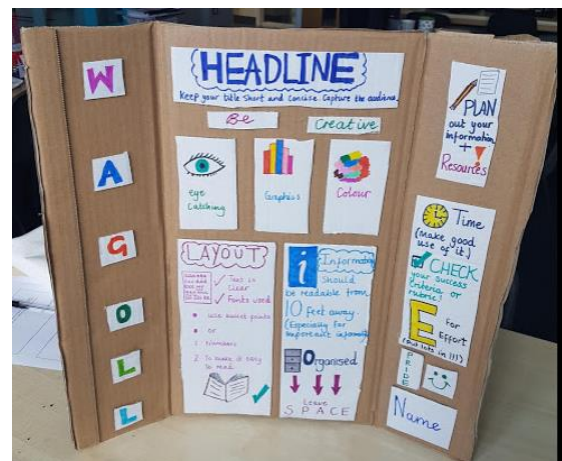

Examples from around the world

Group work points storage containers made from bottles.

Egg timer made from bottles, twigs and dirt.

A Wagoll for creating a poster display.

Languages Games

Periodic table made from an old shoe box.

A hydro-electric system made from cardboard and batteries.

This is a tad ambitious but look what can be achieved! Don't try this at home!

Dice made from Sponge.

Showcasing Work

If you would like to showcase your work all you need to do is:

- Take a pictures of it and explain what it is with your first name, school or class.
- Tweet [@StirlingLfs](https://twitter.com/StirlingLfs)
- Or email sustainablestirling@glowmail.org.uk to put the pictures up.

Please keep photos to pictures of the item you have produced.
